Amicissimo Collegæ

Carolo A. L. Reed, Editori Ephemeridis
"Clinical Brief and Sanitary News," Med. Doct.
et Professori Ordinario Collegii Medicinæ et Chir-
urgiæ Cincinnatiensis.

Hoc opus in signum pietatis dedicat
Die XII Augusti Anni, MDCCCLXXXII.

C. H. von KLEIN, A.M., M.D.

Editionis hujus peculiaris scopus est is, ut Anatomen addiscentibus facilius corporis humani partium imagines ac denominationes persciendi methodus adferatur.

Ad tabulas hasce conficiendas usus sum partim ossibus corporis humani, partim tabulis Anatomicis clarissimorum virorum Loder, Fyfe, Cowper, Lizars aliorumque. Numeri fracti $\frac{1}{2}$, $\frac{1}{3}$, etc. Supra nonnullas figuras inscripti, indicant, quod partes corporis humani, figuris istis representatæ, relative ad magnitudinem naturalem $\frac{1}{2}$, $\frac{1}{3}$, etc., diminutæ sunt.

Tabulæ Anatomicæ reliquæ partes ad editionem etiam præparantur.

AUCTOR.

INTRODUCTORY.

In presenting to the Medical Profession of the United States this useful Anatomical Hand-Atlas, in Latin, I make no apology, as the science of Medicine is open to all ages and nations. It would be highly beneficial (if it could be accomplished) that its technology should be confined to one alone, of the many tongues from which it is at present derived, in order that medicine might have a universal language to which medical men give allegiance, that when two physicians, surgeons or dentists meet from any part of the civilized world, they may understand one another, at least the technical phrases; furthermore, in preparing to publish this atlas, the author was led to a large expense in securing accurate and perfect engravings by the best artists he was able to find. And in order that this work may reach every physician, surgeon, dentist and medical student in the civilized world, it is necessary to sell the work at a trifle; by so doing the plates must be used in all countries where this work may be introduced. All medical men are supposed, should, and must understand the universal medical language. With these few remarks I present the work to the profession, believing that it will speak for itself, leaving it to assume whatever position in their estimation its merits may secure for it.

Respectfully yours,

C. H. von KLEIN, A.M., MD.
